

OUR FOCUS

Francis Tuttle stands ready to support the communities we serve by addressing three key areas:

- Closing the Skills Gap
- Equipping Companies to Transition to the New Economy
- Promoting Economic Development

EQUIPPING COMPANIES TO TRANSITION TO THE NEW ECONOMY

The world of business is changing and, with it, pre-conceived notions of jobs, careers, and the workplace.

The Francis Tuttle Entrepreneurship Academy, to be housed at our new Danforth campus, will equip students with the skills they need to excel in a business world still being defined.

Incorporating innovative curriculum in the areas of design thinking, collaboration, rapid prototyping, and intellectual property protection, the Entrepreneurship Academy will provide the foundation for students poised to be pioneers.

CLOSING THE SKILLS GAP

The metro business community continues to grow across all industry sectors and Francis Tuttle is prepared to be the resource that delivers a well-trained workforce for both traditional markets and emerging Industry 4.0 needs.

- New Industrial Technology building for additional Advanced Manufacturing and Welding programs
- New aerospace programs for Aviation Electrical and Composites Manufacturing

PROMOTING ECONOMIC DEVELOPMENT

Since its inception, the modern CareerTech system has served as the economic development arm of Oklahoma's education system. A large, well-trained workforce is integral to recruiting new businesses to our state and expanding and retaining existing companies.

- More than 700 area businesses served
- Customized curriculum developed
- Cost-reducing incentives available

WHO WE ARE

Francis Tuttle Technology Center serves high school juniors and seniors, and adults, with the career-specific training needed to maintain a quality workforce. Francis Tuttle also offers complete business and industry training and consulting services, and short-term training for career enhancement or leisure activities.
